Adam,

This is Region 9's SOP that they sent to us during the Dimock sampling event.

Subject: Methane analysis question

I'm working on adding a GC-FID headspace analysis for methane, ethane, ethene here at R3. I'm having some trouble getting things started and I was wondering if another regional lab had a working methane analysis. Maybe someone could send me a copy of their SOP or describe the system that they are using.

I'm interested in the whole procedure, column, detector, headspace sampling equipment, oven programs, etc.

Thanks
